Since his claim to fame in the late nineties with Shapeshifter, Adam Zwig has been under the watchful eye of college campuses and indie kids alike. Shapeshifter had one of the most downloaded songs on Napster at one point with, 'My Enemy'. Zwig's decision to go off on his own in 2002 has now lead to his third solo album, 'Cast Iron Letters.' With a blend of grass roots and folkish twangs in such songs like, 'It's All Gonna Fall,' you may find it brings pleasant similarities to Dylan and Neil Young. The CD would be great on a cross country trip or even a trip to self-realization. After giving 'Cast Iron Letters' a few spins your bound to find at the very least one song worth repeating over and over again.
